Step 1: How to Send a File Without Registering an Account

If you want to quickly send a large file, you can do it from the homepage in just a couple of clicks. Here is how:

1. Go to DropSend.com and click on the **Send Your File** button

2. Under **Send a File Now!** type your email address in the **From** field and the email address(es) of the recipient(s) of your files in the **To** field

A screenshot of the "Send A File Now!" form. It features a white background with an orange header. The form includes a "From:" field with the placeholder "youremail@email.com" and a note "(Use a comma to separate addresses)", a "To:" field with the placeholder "recipient@email.com", a "SELECT A FILE" button, and two optional fields: "+ Subject (Optional):" and "+ Message(Optional):". A large green "Send Your File" button is positioned on the right side of the form.

3. Click on the **Choose File** button and browse to the file you want to send.
4. You can add a subject and a message to accompany your file. To do that, expand the **Subject** and **Message** fields and type the text
5. When you are ready to send, click on the **Send Your File** button

The recipient(s) will receive an email containing your message and a link to the file.

Step 2: Create a DropSend Account and Choose a Plan

When you send a file from the DropSend home page, a **Free** account is automatically created using the email you've entered in the **From** field. Once the file is sent, you are automatically logged into your account so that you can edit your details and select the plan that fits your needs.

A screenshot of the DropSend website's plan selection page. The page features a navigation bar with "Tour", "Apps", "Plans", "Enterprise", and "Help" links, along with "Log In" and "Try for FREE!" buttons. The main heading is "Choose the Plan that's Right For You". Below this, there are three columns representing different plan categories: "Personal Plans", "Professional Plans", and "Enterprise". Under "Personal Plans", there are three sub-plans: "Lite" (FREE), "Basic" (\$5.00/m), and "Standard" (\$9.00/m). Each sub-plan lists its features and includes a "Join Free" or "Sign Up!" button. At the bottom, a banner states "More Than 3,000,000 Users Trust DropSend®".

If you'd rather register before you start sending files, go to DropSend.com and click on the **Plans** menu entry.

You will be taken to a page that has all the plans grouped for easy navigation (**Personal**, **Professional** and **Enterprise**). Plans within a group are listed side by side, so that you can easily compare them and select the one that suits you best. Click on the **Sign Up!** button to create an account

Your account will be created and you will be signed up for the plan you've chosen. Depending on your plan, you will be able to send files of up to 8GB in size and store files in your secure online storage space.

Step 3: How to Send Files from Your DropSend Account

To send large files directly from your account, sign in using your email address and password. Once you are logged in, you'll be able to see a summary of your account including the number of remaining sends, your details and your online storage status summary. There are also buttons that allow you to quickly send a file and upload a file to your online storage.

To send a file, click on the **Send a File** button. A new window will open where you'll be able to upload your files and enter the recipient's details plus your message.

If you have files you need to send on a regular basis, we recommend uploading them to your online storage. This way you won't have to re-upload the files every time you want to send

them. To do that, log into your DropSend account and click on the **Online Storage** button:

An upload window will be opened where you'll be able to upload your files with descriptions and create new folders to organize your files:

By default your files are uploaded to the **Storage** folder. To create a new folder, simply type the name of the folder you want to create in the **Type new folder name here** field and then click **OK**. Your new folder will be created and your files will be uploaded to that folder.

Now can send files from your storage. To do that, go to your **Storage** folder (or the folder you've created), select a file you want to send and click on the **Send** icon.
